

FOR IMMEDIATE RELEASE:

Bitnotic Drops "Laptop v1.0" – First Single From Rocking VX-323

PORTLAND, Oregon - March 20, 2007 - Bitnotic today announced the immediate availability of "Laptop v1.0," an electronic pop song MP3 featuring the voices of VX-323. VX-323 is Bitnotic's free MIDI-controlled speech synthesis software for Mac OS X.

The track features the voice Junior singing about a laptop computer's obsessive love for its owner. Clocking in at 3:20 at 120 bpm, "Laptop v1.0" will get the crowds on the dance floor. It might also result in a few people looking at their computers in a different light.

VX-323 svengali Scott Burgess notes, "When you have a talented performer singing about a subject dear to its heart, that's pop dynamite!"

The song was created on a PowerBook G4 using the powerful combination of Apple's Logic Express and VX-323. From composition to mastering and then to MP3 or audio CD, the two programs work smoothly together. Bitnotic describes this process in a new tutorial, "Tech Dispatch 001 - VX-323 and Logic Express" which has been posted to the Bitnotic site.

VX-323 is a MIDI-controlled voice synthesizer software instrument for Apple Macintosh computers. The software enables electronic musicians to easily integrate real-time synthesized speech into their MIDI studios for live performances or CD-quality recording.

Pricing and Availability

"Laptop v1.0" MP3 can be downloaded from <http://www.bitnotic.com/vx-323/audio/audio.html>. While free, Bitnotic appreciates a USD 1.00 donation if the track makes it into a user's rotation.

"Tech Dispatch 001 - VX-323 and Logic Express" can be downloaded from the VX-323 support page at <http://www.bitnotic.com/vx-323/support/support.html>

VX-323 1.0b1 is available now for free download at Bitnotic's web site, <http://www.bitnotic.com>. The software runs on Mac OS X version 10.4 and is a Universal Binary application.
